Benefits of Asset Allocation Using ETFs

Exchange-Traded Funds offer unique benefits when constructing an allocation:

- Diversification** – instant exposure to a variety of asset classes
- Transparency** – sponsor, or provider, announces the contents of portfolio at the beginning of each business day
- Low Expense Ratios^(b)** – allow for a fully-allocated portfolio at a similar cost to a single asset class fund
- Flexibility^(c)** – high liquidity enables fast, easy moves among asset classes

^(b) Ordinary brokerage fees apply.

^(c) ETFs are considered to have continuous liquidity because they allow for an individual to trade throughout the day.

^(d) Actual asset class weightings will change periodically in response to market conditions.

^(e) The current allocations are slightly over or under-weight to the strategic models to take advantage of market opportunities.

^(f) Cash position shown includes all amounts related to pending purchases and sales of investment securities.
